

Latest Data on COVID-19 Death Cases

An Analysis of the First 1153 Death Cases (Source: Centre for Health Protection of the Department of Health)

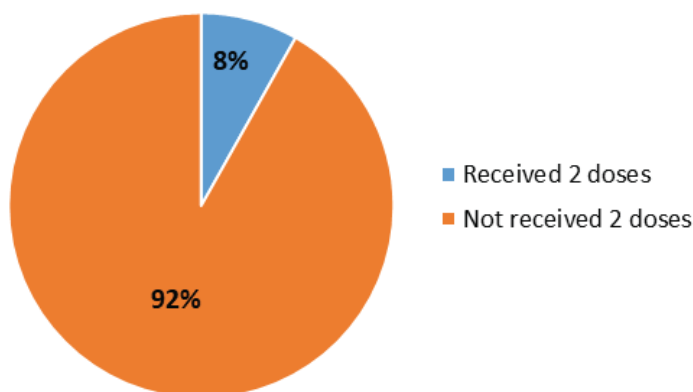

COVID-19 vaccines can protect individuals from severe illnesses and complications from COVID-19.

Locally, **fully vaccinated cases have much lower fatality rate than those not fully vaccinated.**

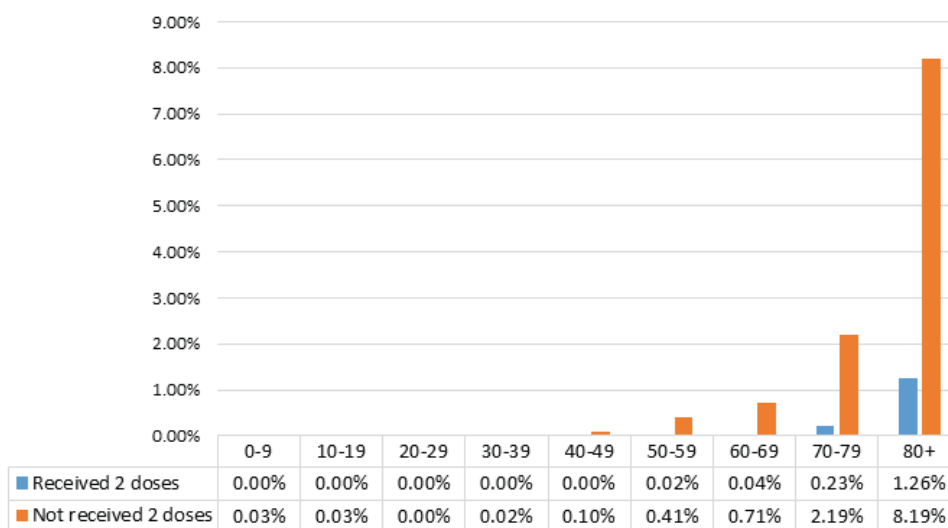

With that, the Government strongly recommended eligible persons (especially those aged under 12 as well as those aged 60 and above) to get vaccinated as soon as possible.

Vaccination History of Deceased in the 5th Wave

More than 90% of deceased in the 5th wave did not receive 2 doses of vaccines

Case Fatality Rate by Age Group and Vaccination Status

At least 5 times lower fatality rate for received two doses
